

PUBLIC NOTICE

REQUEST FOR QUALIFICATIONS (RFQ)

CLOSING: March 26, 2010

Professional Engineering Services

Ray Community Airport (57D) Ray, Michigan

Interested engineering firms are requested to submit experience and qualifications in regard to providing planning, design, and construction inspection services for the following developments at the Ray Community Airport, Ray, Michigan:

- ALP updates
- Construction and rehabilitation of airport pavements
- Airport lighting and electrical
- Airport fencing
- Hangar area development
- Property acquisition
- General consulting, advice and planning on airport development issues
- Additional projects as may be related to the items listed above

Projects listed above are expected to be funded in part by grants, over several years, from the Michigan Aeronautics Commission or with local funding. The selected firm will be subject to state and federal requirements. Services for every contract and description will be for the expected project. Not all the services or development items may be required. The Ray Community Airport Board reserves the right to initiate additional procurement action for any services included in this procurement, but not under contract.

Firms will be ranked on experience and qualifications, personnel qualifications, availability, familiarity with the airport, familiarity with State and Federal requirements including funding issues and the ability to provide a contact with expertise and experience in providing overall project coordination. Additional information may be requested from the top selected firm or firms.

Interested consultants should submit (3) copies of qualifications and experience not later than March 26, 2010 to:

Douglas J. Conciatu
